FAR INFRARED
+ MODULATED
VIBRATION

FUNCTIONAL
MEDICINE

The Vip Hi-Line FIR™ a fully non-invasive system to promote longevity, beauty and anti-aging with a results-driven focus. The system provides a highly customisable treatment framework within a single platform.

VIP technology supports multi-layer physiological modulation through electrical stimulation, thermal activation and targeted biomechanical engagement, enhancing functional performance and elevating anti-aging results, all without invasive intervention.

LONGEVITY
PROGRAMMES

Thanks to its multifunctional design, the platform is widely used in aesthetic and functional medicine, pre- & post-operative care, rehabilitation and longevity programmes.

WHY VIP ENERGIA?

Customisable to Perfection

Global Excellence for GPL-1

CMA global accreditation for use as an adjunctive therapy to GLP-1-based treatment protocols.

100+ Customisable Protocols

100+ fully customizable treatment protocols to effectively meet the diverse needs of your clients.

6-in-1 Technologies

The machine integrates **six advanced technologies** into a single powerful machine, each engineered to address distinct clinical & aesthetic indications.

100% Holistic Solution

Comprehensive Inside-Out therapy. Multi-layer physiological modulation with respect for tissue Integrity.

55 Years of Expertise

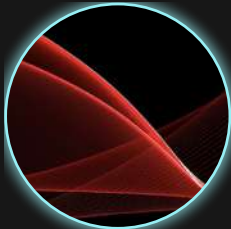

Backed by 55+ years of the industry expertise & continuous innovations.

100% Made in Italy

Fully engineered & produced in Italy in strict compliance with the European safety regulations.

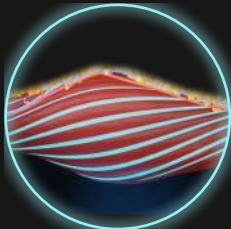

An integrated platform combining **six advanced technologies** for unlimited treatment potential:

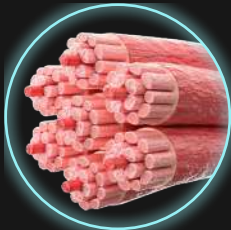

1. Far Infrared Therapy

The FIR technology harnesses far-infrared energy to deliver controlled thermal-mediated cellular support, enhance metabolic efficiency, promote balanced tissue function, while facilitating muscular relaxation & supporting lipolytic activity.

2. Electrical muscle stimulation

The Transion induces powerful isotonic & torsion muscle contractions to support the reduction of localised adipose tissue, enhance muscle tone, promote lymphatic drainage and metabolic activity, contributing to overall vitality.

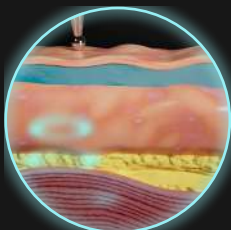

3. NMES

The Isogei delivers neuromuscular stimulation engineered to induce high-intensity muscle contractions, facilitating maximal muscle fiber recruitment. It supports enhanced muscle tone, tissue lifting, and improvement in overall skin appearance.

4. Electro-Lymphatic Therapy

The Linfogeii lymphatic & venous drainage therapy is designed to restore healthy lymphatic function and venous circulation, and assist in the management of edema & fluid retention, producing a deeply restorative & calming neurosedative effect.

5. Modulated Microcurrent & DMA

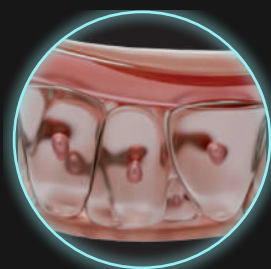

The Microgei combines Modulated Microcurrent therapy with Dynamic Muscle Activation (DMA) to restore facial tissues vitality and support long-term aesthetic rejuvenation, accelerating production of collagen, elastin & hyaluronic acid.

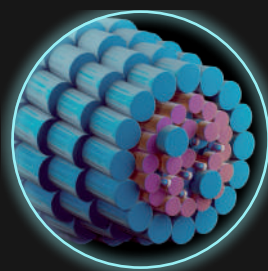

6. TENS Therapy

The Carezza is designed to support optimal muscle function and deep neuromuscular relaxation, contributing to improved muscular balance, tension reduction, and improvement in the appearance of expression lines.

A comprehensive, **multi-layered** treatment for the ultimate regenerative journey

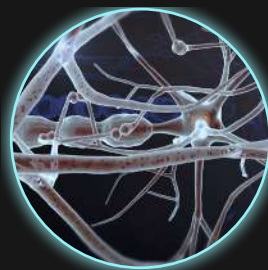

Skin

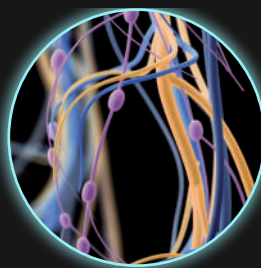

Muscles

Adipose tissue

Nervous system

Lymphatic & Circulatory systems

The **Vip Hi-Line FIR™** provides beneficial therapeutic effects on multiple layers, including skin, muscles, subcutaneous adipose tissue, lymphatic and nervous systems to support long-term rejuvenation and functional well-being.

Our advanced protocols are **designed to support structural enhancement across dermal layers**, while reinforcing foundational support for **adipose compartments, connective tissue integrity, the SMAS layer, and physiological muscle modulation.**

A personalised, science-based approach to beauty & holistic renewal from within

DIVERSE APPLICATIONS

Advanced Aesthetics

Technology-driven comprehensive protocols for facial & body remodeling and tissue rejuvenation.

GLP-1 Adjunct Protocols

Preservation of lean body mass, long-term weight maintenance, treatment-related side effects management.

Longevity programmes

Support of tissue vitality, metabolic balance, and sustained long-term functional performance.

Sports, Functional Medicine

Performance optimisation, injury prevention, recovery & long-term health enhancement.

The **Vip Hi-Line FIR™** enables clinics to address diverse client needs with a single intelligent system, optimizing efficiency, expanding treatment options and making your businesses more profitable in the long run.

Vip Italia is an Italy-based global leader in aesthetic and functional medicine solutions, backed by a **55-years history** of continuous scientific innovation.

Our devices are supplied primarily to aesthetic centers, rehabilitation clinics, longevity-focused facilities and spas in **88 countries worldwide.**
